

Magnolia acuminata

Magasság	20 - 25 (30) m
Szélesség	10-15m
Korona	pyramidal to spreading ovoid, half-open crown, capricious growing
Kéreg és ágak	grey bark, shallow furrowed, branches brown
Leaf	(wide) oval, dark green, 10 - 25 cm
Virágok	yellow green, Ø 6 - 8 cm, June/July, fragrant flowers
Gyümölcsök	brown red to pink red, 5 - 8 cm, seeds bright red
Tüskés/tövises	egyik sem
Mérgező tulajdonság	rendszerint nem mérgező emberek, (nagytestű) háziállatok és haszonállatok számára
Talajtípus	all, except alkaline soils
Ültetési hely követelményei	Elviseli a laza útburkolatot
télállóság	5 (-28,8 és -23,4 °C)
Szélellenállóság	good
Egyéb türöképességek	fagytűrő (télállósági fok: 1-6), széltűrő
Forma	magas törzsű fa, többtörzsű fa
Eredet	eastern part of the United States

In the wild this tree grows in the eastern part of the United States where it grows from a shrub into a multiple-stemmed tree with a loose crown. The smooth, grey bark has shallow furrows. The young twigs are light to red brown and at first they are softly hairy. The large, shiny leaf is smooth underneath, young foliage is hairy underneath. The, for a magnolia inconspicuous, tulip-shaped flowers on short, thick flower stalks are faintly fragrant. After the flowering short-stalked, oblong, thick fruits appear. These have the shape of small cucumbers but appear, due to incomplete pollination, only in small numbers. Inside the fruits there are bright-red seeds. The fleshy roots grow both shallow and deep. In earlier times troughs were often shaped from Magnolia acuminata's straight trunk. The light wood was also used for inlays in decorative furniture.
